TEAM ASSESSMENT

The questionnaire on the following pages is a straightforward diagnostic tool for helping you evaluate your team's susceptibility to the five dysfunctions. At the end of the questionnaire, on page 194, there is a simple explanation of how to tabulate the results and interpret the possible conclusions. If possible, have all members of your team complete the diagnostic and review the results, discussing discrepancies in the responses and identifying any clear implications for the team.

Instructions: Use the scale below to indicate how each statement applies to your team. It is important to evaluate the statements honestly and without over-thinking your answers.

A score of 8 or 9 is a probable indication that the dysfunction is not a problem for your team.

A score of 6 or 7 indicates that the dysfunction could be a problem.

A score of 3 to 5 is probably an indication that the dysfunction needs to be addressed.

Regardless of your scores, it is important to keep in mind that every team needs constant work, because without it, even the best ones deviate toward dysfunction.
